NEWS FROM THE HOME FRONT

Did you know?

Presented by Scott Fleet from the Coral Homes *Clever Living* team

Building a new home is a huge project. It's hard to imagine all the pieces that have to come together to create a home from scratch! For instance, it might surprise you to know that a 30sq single storey home contains the following:

- 42 cubic metres, or 8 truckloads of concrete
- 5700 metres, or 5.7 kilometres of timber
- 10,000 nails
- 7,000 bricks
- 830 square metres of plasterboard
- 175 litres of paint
- In all approximately 5000 types of products are used to construct the home
- More than 100 people are required on site to physically build the home (not to mention people involved in manufacturing, distribution, administration etc)
